SUMMARY

Senior Software Engineer with over 5 years of experience building high-performance web applications and scalable data platforms. Combining a strong frontend architecture background (React, Next.js, TypeScript) with active expertise in AI and ML. Proven track record of leading product development, building real-time data visualizations to make complex systems transparent, and bridging the gap between ML workflows and production-ready user interfaces.

EXPERIENCE

LX media GmbH | September 2026 - Present

Senior Frontend Developer | Wels, Austria

- Engineered a unified middleware solution for Next.js applications, successfully optimizing performance and reducing edge-function costs by approximately 70% for a key client project.
- Streamlined the engineering workflow by migrating UI components into versioned npm packages, integrating automated build checks to guarantee library quality and reliability.
- Proactively built internal tools, including a custom time-tracking utility for AI-assisted dev sessions.

Refinq GmbH | June 2024 – September 2026

Senior Frontend & DevOps Engineer | Vienna, Austria.

- Lead the frontend architecture design and deployment pipelines for a flagship nature and climate risk intelligence platform, with improved local development spin-up times and build efficiency.
- Architected interactive geospatial data visualization dashboards using advanced web technologies to translate complex climate risk datasets into actionable, user-friendly insights.
- Implemented production monitoring and real-time error logging using Sentry, shortening the team's Mean Time to Resolution (MTTR) by proactively capturing and diagnosing client-side exceptions.
- Managed Azure cloud infrastructure and CI/CD pipelines including unit and integration tests using vitest and playwrite, optimizing deployment reliability and system uptime for the entire platform.
- Collaborated directly with the Backend and Data science team to optimize data ingestion pipelines, resolve data bias, and successfully integrate machine learning models into production.

Soar Digitals | September 2022 – August 2023

Frontend Developer | Lagos, Nigeria.

- Built, maintained and scaled a Vessel and Product Management platform with React JS and Typescript to monitor over 1,000 registered Vessels, 100+ products and API requests per day optimized with Graph QL.
- Established leadership direction and mentorship for a 2-man frontend team of different skill levels to build, maintain and ship critical business projects.
- Conceptualized and enforced testing, automation and efficient State Management practices that led to a high reduction of reported software bugs, an 80% Increase in App Performance and a positive increase in overall customer and users' satisfaction ratings.

EDUCATION

- **Johannes Kepler University**, M.Sc. Artificial Intelligence. | Linz, Austria
- **University of Benin**, B.Sc. Petroleum Engineering. | Benin City, Nigeria.

SKILLS

- **Software Development:** JavaScript (ES6+), TypeScript, React, Next.js, Node.js, State Management, Python, PyTorch, Fast API, System Design, Object-Oriented Programming, Data Structures & Algorithms.
- **Cloud, DevOps & Tooling:** Azure, Docker, GitHub Actions (CI/CD), Vitest, Git, Git-Hub Actions.
